

FIND A SOLAR RECYCLER

<https://www.elecsome.com>

Elecsome is Australia's first Solar Panel upcycling plant that operates by transforming End-of-Life Solar Panels into higher value products. It has a handling capacity of 5T/hr, which translates to about 250 panels/hour. That makes the total capacity of 1M panels per annum.

<https://www.pvindustries.com.au>

PV Industries provides convenient collection and drop-off for end-of-life solar panels and equipment, followed by expert disassembly and advanced material recovery to reclaim aluminium, glass, copper, silver and other valuable resources. Using world-leading recycling processes, the company maximises landfill diversion while minimising environmental impact through highly efficient, sustainable processing. PV Industries is well positioned to service multiple areas across NSW, VIC, ACT and SA through our own sites and a widespread network of partner drop-off locations for all their customers.

Commercial and Large scale (National), Household and Domestic Collections (Sydney, Melbourne)
